

SPRIT FITNESS POWER REQUIREMENTS*

TREADMILLS

All Spirit Fitness treadmills require power to operate regardless of console configuration. Circuits should be dedicated to each machine and require a non-looped (isolated) ground.

	120V/20AMP	120V/15AMP
CT900ENT	X	
CT900	X	
CT850ENT	X	
CT850	X	
CT800		X
XT685		X
MT200	X	

- A dedicated circuit for each unit requires each outlet does not have anything else operating on the same circuit.
- A non-looped (isolated) ground requires that each circuit has an individual neutral/ground connection from it and terminating at an approved earth ground.
- The power cord on treadmills uses a NEMA 5-20P plug (except for CT800 and XT685 which can use the NEMA 5-15P).
- The treadmill receptacle must be a NEMA 5-20R receptacle (except for CT800 and XT685 which can use the NEMA 5-15R).

	CRW800	X	

- For those non-treadmill cardio units that require power, they use a NEMA 5-15P plug.
- Those that require a 120V/15AMP circuit, they do not require a dedicated circuit. Up to four (4) units may be daisy-chained together on each 15AMP circuit.
- The non-treadmill cardio receptacles must use a NEMA 5-15R or NEMA 5-20R T-slot receptacle.
